Hacibey Catalbasoglu Announces Campaign for Ward 1 Alder

New Haven, CT—Lifelong New Haven resident and Yale sophomore Hacibey Catalbasoglu is excited to announce his campaign for Ward 1 Alder.

A first generation college student, Haci epitomizes what New Haven and Yale stand for. After coming to the United States in search of a better life for his family, Haci's father worked at pizza restaurants around the city before opening the popular restaurant Pizza at the Brick Oven. Working at New Haven pizzerias from a young age, Haci has grown up around New Haveners and Yalies, and he understands firsthand of what our community means for so many.

Having lived in New Haven his entire life, Haci is well equipped to address the issues New Haven is facing. A graduate of Wexler-Grant, Savon Rock Elementary, and Carrigan Middle School, Haci understands the importance of investing in education so his classmates can have the same opportunities he has had. As the child of Turkish immigrants, Haci knows firsthand what immigrants bring to our community. And, having grown up working in a family-owned pizzeria, Haci understands the challenges that local businesses face.

For many years, Haci has volunteered for the New Haven Livable City Initiative through New Haven's Youth@Work program. This year, he was nominated to serve on the city's Commission on Homelessness and, last summer, Haci interned for U.S. Senator Chris Murphy, which gave him a new perspective on New Haven's place in the national landscape.

Haci is running to be Ward 1 Alder because he wants to help improve the city that has enabled his family to achieve the American dream. Regarding New Haven, Haci states, "You can't stand for something unless you have a stake in it. Building a stronger relationship between New Haven and Yale is critical for everyone in our community." He adds, "These are my people. I'm not leaving when I graduate. If I am elected Alder, I want to help people who didn't have the opportunities I've had. People who fall through the cracks, who didn't have parents like mine, who weren't lucky enough to come to Yale."

Ward 1 encompasses most of Yale University and has been traditionally represented by an undergraduate Yale student.
